

Kanfer Shipping signs small scale LNG cooperation scheme with ADNOC Logistics & Services

We are pleased to announce that Abu Dhabi maritime services company, ADNOC Logistics & Services (L&S), and Norwegian Kanfer Shipping AS, have signed a global cooperation agreement to explore the small-scale LNG market. Such cooperation will include potential transportation, storage (onshore/offshore), bunkering as well as other LNG infrastructure. The parties are currently jointly developing several projects. ADNOC L&S will have an influential role in the project and the commercialisation process. The focus areas for this cooperation will be pure transportation, gas to power and bunkering projects.

“We are proud to have ADNOC onboard in this cooperation. We clearly see that large- and small-scale LNG goes hand in hand, and we believe there are considerable synergies that could be achieved between the parties. With ADNOC’s know how, experience and interest in developing the small-scale LNG market, we are confident that we will be successful”, says Managing Partner in Kanfer Shipping, Stig A. Hagen.

About Kanfer Shipping

Kanfer Shipping AS is a small-scale LNG infrastructure company with focus on shipping, floating storage and bunkering. Kanfer has identified and working concrete projects in 3 continents and owns a unique design for a cost efficient, flexible and scalable transport and floating storage solution that is based on the Articulated barge solution (ATB).

About ADNOC Logistics & Services
